

# ROBOTIC SORTING AS A SERVICE

## FLEXIBLE ROBOTIC SORTING FOR EVERY STAGE OF YOUR BUSINESS GROWTH

ACHIEVE EFFICIENT SORTING OUTCOMES WITHOUT THE HASSLE OF OWNERSHIP

### WHAT IS ROBOTIC SORTING AS A SERVICE?

Robotic Sorting as a Service is a revolutionary approach to logistics operations that allows you to access advanced robotic sorting technology without the need to own or manage the equipment. Instead of investing heavily in a complete robotic system, you pay only for the sorting outcomes you need, when you need them.

With Robotic Sorting as a Service, you get all the benefits of our innovative Robotic as a Sorting solution without the burdens or costs of ownership.

*smart vision, smart flow*

## WHEN TO CHOOSE FOR ROBOTIC SORTING AS A SERVICE?

### Flexible scaling

Robotic Sorting as a Service is ideal when your operational demands fluctuate significantly. During peak seasons or sudden surges in orders, you can quickly scale up sorting capabilities without needing long-term infrastructure investments. Conversely, in quieter periods, you can scale down to avoid overcapacity and reduce costs.

### Cost-effective operations

This service model is perfect for businesses looking to shift from fixed capital expenses to a more flexible cost structure. By only paying for the sorting performance you need, you avoid substantial upfront investments in equipment and technology. This approach aligns costs with business activity, enhancing financial flexibility and reducing the risk associated with capital-intensive projects.

### Hassle-free management

For companies that prefer to concentrate on their core competencies, outsourcing the complexities of robotic sorting is a smart choice. The service provider manages all aspects of the robotics system, including software, hardware, maintenance, and regular updates. This ensures that your sorting system remains up-to-date and efficient without draining internal resources or requiring specialized technical expertise.

## KEY BENEFITS

On top of the advantages of our Robotic Sorting solution, Robotic Sorting as a Service provides the following benefits:

- **Risk mitigation** - Eliminate equipment ownership risks and depreciation concerns while maintaining cutting-edge sorting capabilities.
- **Streamlined operations** - Operate without specialized technical staff or complex system management, reducing organizational overhead.
- **Guaranteed performance** - Access reliable, precisely-tuned sorting operations that consistently deliver the results you need, when you need them.

## FROM CONSULTATION TO GO LIVE WITHIN 4 WEEKS!

Engaging with our Robotic Sorting as a Service is a straightforward process designed to quickly integrate innovative automation into your operations. From the initial consultation to going live, we make sure every step is efficient and tailored to your needs. The entire process can be completed in as fast as 4 weeks, so you can start benefiting from optimized sorting quickly. Here's how it works:

- **Consultation** - We visit your location to explore the possibilities.
- **Deploy** - Go Live!
- **Continuous optimization** - We monitor and refine system performance, offering ongoing support and proactive recommendations to optimize sorting capacity.
- **Scale up or down** - Adjust system capacity based on your business needs.
